

Be Ready

March 2023

Tick-tock, tick-tock, tick-tock...

We're slowly but steadily heading toward the end of the BeReady Project. Luckily the world is also heading towards the end of the COVID-19 pandemic. From the beginning, the BeReady project's goal was not only to give teachers and students tools and knowledge to support them during the pandemic but also to equip them with skills and creativity that will help them through different challenging educational circumstances. Have we succeeded? Time will tell.

Meanwhile, we'd like to officially announce the date of the BeReady final conference: **Education in pandemic – lesson learned about online teaching.**

The meeting will take place on **Friday, April 28, 2023**, at the Warsaw University of Technology Centre of Innovation and Technology Transfer Management.

The conference aims at communicating, discussing, and exchanging activities and educational ideas on online education of STEM subjects with practitioners from Poland and selected EU countries. The best practices collected during the Covid-19 period will be presented and shared during the conference.

See you soon!
